

## Captain America #227 (Captain America)

Captain America runs through the bowels of the helicarrier, hounded by an army of Red Skulls. In the control room, the true Red Skull gloats. When the sun rises momentarily, its rays will be reflected through a magnifying prism, killing the chained Nick Fury. Soon afterward, Cap defeats a Skull sentry and enters a parlor, where Red Skull awaits. Cap throws his shield, but its caught in Red Skulls magnetic barrier. Skull alerts Cap that the rising sun is about to kill Fury, and warns Cap that if he attacks or tries to save Fury, he will activate the Deaths-Head ray sooner than planned. Recalling Buckys death, Cap appears frozen with indecision, allowing the rising sun to cook Fury. When Skull taunts Cap, the Avenger lashes out, capturing the control unit and deactivating the Deaths-Head satellite, causing it to explode. Skull changes back into Nick Fury and collapses. Cap tells Fury that he had tricked Red Skull: noticing that the captured Nick Fury wasnt sweating, he had realized it was actually an LMD.
