

Extinction

An extraordinary discovery in the Sahara desert will turn history on its head...A series of unexplained phenomena create shockwaves across the globe - a huge religious statue moves its arm, and there's a spate of floods and earthquakes. Many think it's the end of the world...Investigative journalist Alyssa Durham receives a call from an old friend claiming that these phenomena may not be entirely natural, but when he is assassinated in front of her, she finds herself on the run for her life. Alyssa teams up with Jack Murray, a scientist from a secretive government research laboratory, to uncover the truth. But who wants them dead, and what are they trying to protect? As chaos descends, Alyssa and Jack are drawn into a battle against an unknown enemy with the highest possible stakes, because one thing they've learnt is that nothing is safe from extinction...
