

## Other suns than ours. A series of essays on suns--old, young, and dead, with other science gleanings, two essays on whist and correspondence with Sir John Herschel

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887. Excerpt: ... CHAPTER XXII. THE MISUSED H OF ENGLAND. There are few subjects more curiously interesting, alike to the student of science and to those who do not care specially for scientific inquiry, than the peculiarities of a language as spoken by different sections of the same people. There can be little doubt that by rightly understanding these localisms we are enabled to advance a step towards the interpretation of those wider diversities which distinguish the speech of races not forming the same nation, but having a common origin. Any one who, in England, for example, studies the peculiarities of dialect in the southern, western, eastern and northern counties--peculiarities still so great that the inhabitants of certain localities find it difficult to comprehend standard English (so to describe English as spoken by the most cultured classes)--will be well on his way to understand how the various languages of Europe had their origin from a common stock. In particular we learn to recognize how, though we may not so easily understand why, in some communities changes of a certain kind in consonantal and vowel sounds systematically prevail. Thus in certain northern English counties the *i* is systematically pronounced *oi*, in others *ee*; so that as far as this vowel sound is concerned we can always translate the county language into common English by changing the *ofs* or the *ees*, as the case may be, into *zs*. In Wiltshire and Somersetshire, the *js* are all turned into *zs*; elsewhere, the *os* are changed into *oas*, the broad *as* into *s*, and so forth. In the Celtic parts of Great Britain, as in the Highlands and in Wales, we find wider examples of Grimms law in the altering of *?s* into */s*, *ds* into */s*, *vs* into
