

Spiders (Science and Nature for Young Readers)

Did you know that spider silk is stronger than steel of the same thickness? Or that the venom from a Black Widow is more powerful than a Rattle Snake's? Did you know that the Kauai Cave Spider is blind and that it can only be found in a few caves on the Island of Kauai? Learn all about the mysterious world of SPIDERS in the Science and Nature Series for Young Readers. The Science and Nature Series is written by a former teacher and an award-winning textbook author who has a background in the biological sciences. Each book provides a supplementary resource for units on Spiders, Fish, Coral Reefs, and Sea Turtles. Recommended for middle school children ages 9-12. Add them to your school or home school curriculum today.
