

Suicide Robots

Suicide Robots is Novella I of the Electric Fields series. Ride The Fire! Official Maxim of 1st Marine Orbital Battalion, MOB-1. The saga began in 3140 when a rouge planet was guided into Earth's orbital plane by the Dracin Empire. Lt. Col. Stanford Breechblock Abrahams MOB-1 led the assault to save Mother Earth from environmental destruction. After making planetfall with airtrac dropships, MOB-1 struck with both armored and air assaults to overwhelm objectives. But the Dracins, assisted by a Russian adviser, were a formidable adversary. They trapped the Marines on an electric field, then unleashed waves of suicidal robots at MOB-1 that were programmed for destruction. Earth's celestial stability and MOB-1's survival hinge on the outcome of the Electric Field showdown.
