

Sustaining the Earth: An Integrated Approach (Non-InfoTrac Version)

The briefest of Millers three texts, this inexpensive black-and-white alternative covers all the major topics found in Millers other two texts, LIVING IN THE ENVIRONMENT: PRINCIPLES, CONNECTIONS, AND SOLUTIONS, TWELFTH EDITION and ENVIRONMENTAL SCIENCE: WORKING WITH THE EARTH, EIGHTH EDITION. It provides an integrated approach emphasizing solutions and distilling the key concepts in environmental science to offer students the basic material for about half the price of other environmental science texts.
