

# Teaching Psychiatry to Undergraduates

Over the last decade there has been a decline in interest shown by UK medical school graduates in choosing to specialise in psychiatry as a career, as shown by the falling proportion of candidates from the UK taking the MRCPsych examinations. The impression currently given by undergraduates, foundation and specialist trainees suggests that the medical student experience of Psychiatry is currently a dispiriting one. A survey of psychiatrists in 2003 highlighted the link between the quality of undergraduate teaching and the recruitment of young doctors to pursue a career in psychiatry. This book contains advice on how to teach psychiatry to undergraduate medical students using a range of different methods in different settings. It addresses some of the theory and practical aspects of teaching psychiatry to medical students. Different chapters focus on: giving a lecture; small group teaching; clinical teaching; problem based learning; and the use of simulated patients and role play. There is also advice on involving trainees and service users in teaching and in teaching psychiatry internationally. The later chapters focus more on issues relating to recruitment. The book's content represents an important step towards the delivery of high quality and inspirational undergraduate teaching. RCPsych Publications is the publishing arm of the Royal College of Psychiatrists (based in London, United Kingdom), which has been promoting excellence in mental health care since 1841. Produced by the same editorial team who publish The British Journal of Psychiatry, they sell books for both psychiatrists and other mental health professionals; and also many written for the general public. Their popular series include the College Seminars Series, the NICE mental health guidelines and the Books Beyond Words series for people with intellectual disabilities. RCPsych

publishes in all areas of psychiatry and mental health, including but not limited to: Clinical psychiatric practice Intellectual disability Mental health services for children, adolescents, adults and the elderly Psychopharmacology Psychotherapy Rehabilitation psychiatry Family mental health Service provision RCPsych Publications books can help with the following disorders: Addictions Affective disorders Attention deficit hyperactivity disorder (ADHD) Bereavement Borderline personality disorder Cognitive-behavioral therapy (CBT) Dementia Depression Eating disorders Perinatal psychiatric disorder Post-traumatic stress disorder (PTSD) Psychosis Schizophrenia Sleep problems
