

The Californians

Captain John Allaire leaves San Diego for a six month journey to India aboard the clipper ship Dreadnaught. Two months later his wife Molly with their infant son and her cousin Kate are aboard a steam launch in San Diego bay, returning from visiting a just arriving vessel whose captain had news of her husband. An accident results in the drowning death of her son, causing Molly to have a mental breakdown. During her time of mental incapacitation her cousins husband manages her financial affairs---to his benefit. She later recovers her reason but discovers it has been four years since the accident. To make matters worse she finds that Captain Allaires ship has never returned and Kate along with her crooked husband Lew have disappeared. But Molly never gives up hope and is determined to find out what happened to the Dreadnaught and its crew. In the end the ships fate is revealed along with some totally unexpected discoveries. Besides the title story a pair of short stories is included. The first deals with a greedy doctor who gets his just reward and the second is a tale of adventure in the frozen north.
