

## The Man-eaters of Tsavo and Other East African Adventures (Illustrated)

It must be remembered that at the time these events occurred, the conditions prevailing in British East Africa were very different from what they are to-day. The railway, which has modernised the aspect of the place and brought civilisation in its train, was then only in process of construction, and the country through which it was being built was still in its primitive savage state, as indeed, away from the railway, it still is. If this simple account of two years work and play in the wilds should prove of any interest, or help even in a small way to call attention to the beautiful and valuable country which we possess on the Equator, I shall feel more than compensated for the trouble I have taken in writing it.
