

The Snow Tiger

A small mining community in New Zealand is devastated when the snow tiger (an avalanche) rips apart their entire township in a matter of minutes, killing fifty-four people. In the course of the ensuing enquiry, the antagonisms and fears of the community are laid bare, and a ruthless battle, for control of a multi-million pound international mining group, is exposed. The tension in the courtroom mounts as each survivor gives his graphic account of the terrifying sequence of events.
